Highly experienced full-stack developer with over 6 years of experience building and maintaining web applications using NodeJS and .NET Core. Proven ability to design, develop, and implement high-performance, scalable, and maintainable web applications. Expertise in all aspects of the fullstack development process, including front-end development, back-end development, and DevOps. Strong understanding of NodeJS and .NET Core, ReactJS, TypeScript, and related web technologies. Experience with RESTful APIs, microservices architecture, and cloud platforms such as AWS or Azure. Excellent problem-solving and analytical skills. Ability to work independently and as part of a team. Strong communication skills and hard working. I am willing to learn new programming languages, looking for long term commitment.

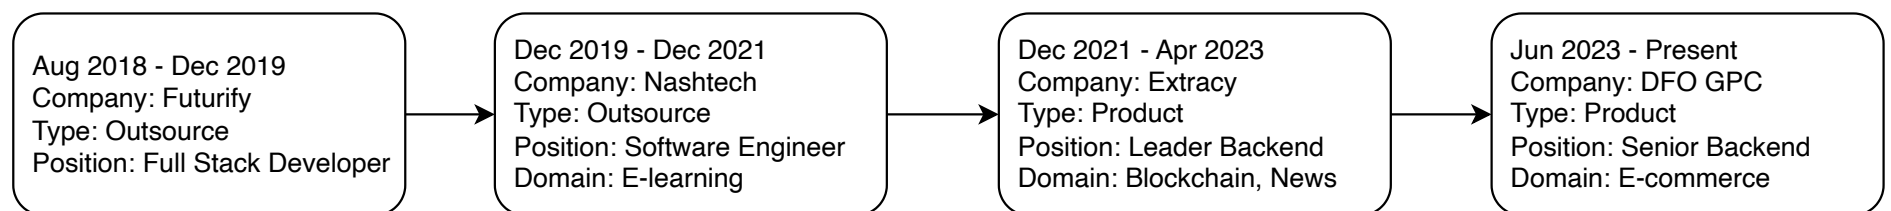

Favorites: read books, algorithms, math, AI.

Available for work immediately.

SKILLS

Backend	TypeScript NodeJS, NestJS, NextJS C# .NET core	API	REST API, GRAPHQL
FrontEnd	ReactJS, Redux, Bootstrap, Tailwindcss	Message broker	Azure service bus, SNS - SQS, RabbitMQ
Database	MSSQL, MySQL, MongoDB, Redis, Postgres, DynamoDb	CI/CD	Azure pipeline, Jenkins, Github Action
Framework	NestJS, NextJS v14, NextAuth v4 Express, Fastify .NET core version: 3.1, 5, 6, 7, 8	Hosting	Cloudflare
		VPS	EC2, Azure AppService, Azure Function, Contabo, Physical server

WORK EXPERIENCE

PROJECTS

Jun 2023 - Present

Company **DFOGPC**
Project **CTRWOW - CXWow**
Position **Senior backend**
Members 10

DESCRIPTION

DFOGPC is a Canadian e-commerce company. I worked on two main projects: CTRWow and CxWow. CTRWow: A drag-and-drop website builder that automates static website publishing using FTPS and S3 hosting. CxWow: A customer service management platform that integrates AI (ChatGPT) for automatic request assignment, offering a customized solution similar to Atlassian for specific customer needs.

TECHNOLOGIES

- CXWow: Microservices, Azure function nodejs: Express and Fastify, NextAuth v4 Login, MongoDB, Redis cache, Azure service bus, AI Model ChatGPT model 4, WebSocket, Mailgun, API Gateway.
- CTRWOW: Microservices, Azure function v4 .Net 6 and .Net 8 in-process model, MongoDB, Redis cache, Azure service bus, Azure Event, Azure Blob, API Gateway.

CONTRIBUTED

- Upgrade azure function v3 to v4.
- Build OAuth by NextJS v14 and NextAuth v4
- Nodejs Express, Fastify.
- Upgrade .Net 3.1 and .Net 6 to .Net 8.
- Migrate azure function in-process model to isolated model.
- Create web socket push notification, send emails and chat real-time.
- Create web socket push notification and chat real-time.
- Collaborate with QC team and other teams.

- Optimize cost equals scan search blob is unused to delete.
- Improve performance with MongoAtlas, search index and some techniques to improve performance with DB.
- Raise ideas improve product, performance and optimize cost.
- Discuss with Canadian Project Manager to confirm requirements.

Apr 2022 - Apr 2023

(The company has ceased operations)

Company **Extracy**
Project **Wallet**
Position **Leader backend**
Members 6

DESCRIPTION

Build Duende Identity to provide social login and OAuth2 login with hybrid flow. Build microservices with .NET Core and NestJS. Import folders from Trust Wallet and filter and insert data. Use Web3 to read data from RPC and push notifications using Firebase. Build and host RabbitMQ to sync user data. Research and learn about smart contracts. Implement CI/CD using Jenkins, Docker, and Nginx. Use CentOS and VPS Contabo to host the project. Train new team members and assign tasks to them.

TECHNOLOGIES

- .Net 7, Duende Identity, OAuth2
- NodeJS (Nestjs), PDF lib, passport.
- SQL, MongoDB, Firebase ReactJS, Web3, RabbitMQ.
- Docker, nginx, jenkins.

CONTRIBUTED

- Init project and apply clean architecture.
- Get data from CoinGecko, TrustWallet and store to data warehouse.
- Implement social login with Duende Identity OAuth2 standard.
- Social login facebook, twitter with web3.
- Webhook discord, telegram.
- Versioning API
- Implement 2-Factor Authentication.
- Setup and configs Nexus Sonatype store docker hub, configs Jenkins for CI/CD.
- Deploy projects with docker.
- Config Azure pipe-line and Azure webhook with Jenkins.
- Config Azure permission.
- Proxy with nginx.
- Map DNS domain, config networks.
- Mentor member.

Feb 2022 - Apr 2022

Company **Extracy**
Project **OBL Hub**
Position **Leader backend**
Members 12

DESCRIPTION

The main focus of backend coding is building the structure, coding APIs, and communicating with PM and B A to design the database. Setup S3 bucket. Implementing API authentication and authorization, custom JWT to adapt to the business, managing the team, and assigning tasks to team members, build core ReactJS, create docker and deploy web to VPS centos 7, setup nginx and jenkins.

TECHNOLOGIES

- Typescript, .Net 6, SQL, ReactJS, S3, Onion Architeture, Docker, nginx, jenkins.

CONTRIBUTED

- Init project and apply clean architecture.
- Implement authorization and authentication grant type hydrid.
- Install and configs Nexus Sonatype store docker hub.
- Install and configs Jenkins for CI/CD.
- Config Azure pipe-line and Azure webhook with Jenkins.
- Proxy with nginx.
- Map DNS domain, config networks.
- Deploy single page to S3.
- Discuss with BA to create tasks and assign to member.
- Mentor member.

Dec 2021 - Feb 2022

Company **Extracy**
(OneBlock Labs)

DESCRIPTION

FVC is a web application for callers and investors. Callers can post their projects, and investors can review and provide capital. FVC's task is to manage the list of potential

Project **FVC**
Position **Backend developer**
Members 4

projects and schedule meetings for the two sides to meet.

- TECHNOLOGIES**
- EF core 2.1, SQL, Store procedure, AWS S3, EC2, OneSignal.
- CONTRIBUTED**
- Maintain old project.
 - Implement feature worker.
 - Implement feature push notification to mobile use OneSignal.
 - Fix bug store procedure.

Dec 2019 - Jul 2021
Company **Nashtech**
Project **US_Kaplan**
Position **Software engineer**
Members 28

- DESCRIPTION**
- Implement main feature is a Calculation Service to calculate the point for the Leaner, write unit tests for the code, call get data from GraphQL service, ensure that data works correctly, implement the design system from the team leader, improve UI performance, and report tasks to the team leader and PM.
- TECHNOLOGIES**
- EF core 3.1, Table per hierarchy, SSO, Identity Server 4, OAuth2, GraphQL, microservice.
 - Typescript, ReactJS.
 - AWS services, S3, SNS, SQS.
 - MySQL, DynamoDb, Redis cache, Memcached.
 - design pattern: Singleton, Factory, CQRS, Builder, Mediator

- CONTRIBUTED**
- Write Unit Test.
 - Implement task.
 - Implement new API with GraphQL.
 - Involve build table table per hierarchy and calculate point.
 - Fix bugs.

Aug 2018 - Dec 2019
Company **Futurify**
Project **Milano-Coffee - VietCredit - RVezy**
Position **Fullstack developer**
Members 8

- DESCRIPTION**
- Milano-Coffee is Project manage warehouse and sales, order drinks. VietCredit is project create a form for borrowers to register for loans. RVezy is an RV rental platform where you can book unique RV experiences with local motorhome and trailer owners. You can drive, tow, or get your RV delivered and set up practically anywhere across the U.S. and Canada.
- TECHNOLOGIES**
- EF core 2.0, EF core 2.1, SQL, microservice, API gateway.
 - Angular js, Angular 7, SOAP, SQL.
 - RabbitMQ, ElasticSearch, Fluent API.

- CONTRIBUTED**
- Implement API.
 - Implement Role and Permission.
 - Implement Paging.
 - Fix bugs.
 - Create form with angularjs allow user register for loans.
 - Validate form.

PET PROJECTS

Sep 2024- Oct 2024
Project **Next CRM**

Jul 2024- Sep 2024
Project **Trakle**

- DESCRIPTION**
- I developed multi tenants SSO app, manage multi merchant, switch login multiple users.
- TECHNOLOGIES**
- NextJS v14, NextAuth v4, ReactJS, Tailwind css, Social Login (Google, Facebook, Telegram), MongoDB, Redis cache, Memory cache, Github Action deploy to Azure WebApp.

DESCRIPTION

Background job call data Binance to Analyze and calculate EMA, RSI, auto trade, Bot auto send announcement to telegram channel, chat BOT with OpenAI, create prompt auto renew message to telegram channel, use apexchart draw chart.

TECHNOLOGIES

NestJS, Task schedule, OpenAI, Chat GPT model-4o, TelegramBot, MongoDB, docker.

Feb 2024- Mar 2024
Project **Telegram mini app**

Link: https://t.me/degon_ido_482765_bot

DESCRIPTION

Build telegram mini app allow user connect TON wallet and send token amount.

TECHNOLOGIES

ReactJS, Jetton, Vite, TelegramBot.

Dec 2022- Feb 2023
Project **SumoTour**

Link: <https://sumo-america-trading.com>

DESCRIPTION

Project to book tours in Japan, manage users, and send emails when tours become available. I used Nestjs build Backend and ReactJS build Front-end, use mongoDb license free, use mailgun to send email to user, deploy to contabo VPS with docker and use nginx to reverse proxy, use Cloudflare to map DNS and https vertificate.

TECHNOLOGIES

NestJS, MongoDB, ReactJS.

EDUCATION

School **MEKONG UNIVERSITY**
